

Media Replacement Schedule Predator 1200 UV – PRED1200UV

1. F621 - Coarse Particulate Filter
 - a. High Particulate- every 8 hours
 - b. Medium Particulate- every 48 hours
 - c. Low particulate- every 72 hours or until filter light goes on

2. H502UVR - UV Resistant Pleated Particulate Pre-filter
 - a. Use filter indicator light to determine needs
 - b. High Particulate- estimate 72 hours
 - c. Medium Particulate- 3 x/ month
 - d. Low particulate- 1 x/ month or when filter light goes on
 - e. Warning: The UV-resistant pleated H502UVR filter provided with the PRED1200UV is specially designed for use with UV lamps.
 - f. Do not use the H502 pleated filter or substitute other filters because these products may off-gas, produce unpleasant odors, degrade, and in some cases, completely deteriorate.

3. H610C-99 - HEPA Filter
 - a. Every 9,000 hours
 - b. 1 year and a half (even if 9,000 hours has not been reached)

4. UV415 - UV Lamp
 - a. The UV lamp has a rated service life of approximately one year, provided it is not turned “ON” and “OFF” several times a day. The lamp should be replaced at least once each year.
